

Guilherme Araújo

Gameplay Programmer | Game Developer | Software Engineer

Dublin, Ireland | +353 087 625 4021 | STAMP 4 - Full Rights to Work in Ireland | guilherme.alm.araujo@gmail.com
| <https://www.linkedin.com/in/guilhermealmaraujo/> | <https://github.com/guilhermealmaraujo>

Software Developer with 8+ years of professional experience in software engineering, including C#, object-oriented programming, software architecture and technical leadership, currently transitioning into game development. Building gameplay systems and playable prototypes in Unreal Engine 5 using Blueprints, while developing C++ skills for gameplay programming. Combining professional software engineering experience with strong interest in game systems and technical design. Seeking opportunities in Gameplay Programming, Game Development or Technical Design.

Game Development Projects

Stormwreck Isle – Exploration System

Unreal Engine Developer / Systems Designer | Personal Portfolio Project | 2026

Designing and implementing a systemic exploration prototype in Unreal Engine 5, combining location-based gameplay with a hex-based overworld exploration system.

- Developing a playable exploration prototype in Unreal Engine 5 using Blueprints.
- Implemented level transitions between explorable locations and the overworld map using reusable Blueprint actors and collision triggers.
- Designing a hex-based overworld system for travel, exploration and location discovery.
- Designed terrain-dependent environmental hazards, encounters and traversal mechanics.
- Designed modular encounter systems incorporating creature behaviour and narrative context.

Avernus – Systemic Hexcrawl Redesign

Systems / RPG Designer | Personal Project | 2024 - 2026

Redesigning a traditional D&D campaign into a systemic hexcrawl focused on exploration, emergent gameplay and player-driven decision-making.

- Redesigning overworld exploration around hex-based travel, navigation and character travel activities.
- Designed resource management, environmental hazards and dynamic world events.
- Developed encounter structures supporting environmental storytelling and emergent gameplay.
- Balanced probabilities, traversal difficulty and player risk/reward.

Professional Experience

Software Developer – Client Integrations | Flip-Pay

Dublin, Ireland | Nov 2022 – Present

- Implement and support client integrations by configuring the Flip-Pay platform and adapting front-end and back-end components to meet client requirements.
- Analyse client requirements and existing system capabilities to identify appropriate technical solutions and determine when product changes or additional development are required.
- Investigate integration issues through code analysis, debugging and troubleshooting, implementing bug fixes and minor improvements when required.
- Collaborate with clients and internal development teams to translate business requirements into technical solutions using JavaScript, Angular, C#, .NET and APIs.

Software Developer – NoFrixion

Dublin, Ireland | Apr 2022 – Aug 2022

- Developed and maintained financial web applications and APIs using C#, .NET Core, Entity Framework, TypeScript and SQL Server.
- Worked with third-party API integrations and automated integration/unit testing.
- Collaborated within a small development team using Git, Jira and Agile development practices.

Tech Lead | Software Developer – FitBank 450

Fortaleza, Brazil | Jun 2021 – Mar 2022

- Developed and maintained large-scale financial systems, APIs and microservices using C#, ASP.NET

MVC, JavaScript and SQL Server.

- Led a team of Junior Developers and Quality Analysts, supporting technical decisions and software delivery.
- Contributed to the implementation of Brazil's PIX instant-payment system, with responsibility for the QR Code component.
- Worked with Git, Azure DevOps and Jenkins across development, project management and deployment.

Software Developer – Tactium

Fortaleza, Brazil | Feb 2021 – Jun 2021

- Developed and maintained CRM web applications using C#, ASP.NET MVC, Entity Framework, JavaScript and SQL Server.
- Implemented features, API integrations and bug fixes within a senior development team.

Software Developer – Wipro

Fortaleza, Brazil | May 2019 – Dec 2020

- Developed enterprise desktop and web applications using C#, .NET, ASP.NET MVC, JavaScript and SQL Server.
- Contributed to industrial automation software supporting machinery and production-line processes.
- Collaborated across development teams and business departments using Git and Azure DevOps.

Junior Software Developer – ND Engenharia e Software

Fortaleza, Brazil | Jan 2018 – Apr 2019

- Developed and maintained laboratory-management desktop and web applications using Delphi, C#, ASP.NET MVC and SQL Server.
- Collaborated on feature development and maintenance using Git and Visual Studio.

Assistant Project Manager – Poligono Ambiental

Fortaleza, Brazil | Jun 2015 – Dec 2017

Supported technical design and project delivery, developing Google Apps Script automation tools for structural calculations and cost estimation.

Software Developer Intern – Xlung

Fortaleza, Brazil | May 2014 – May 2015

Developed an educational web application using Ruby on Rails, HTML and CSS as part of a university sponsored project.

Education

Bachelor's Degree in Computer Science

Ceará State University (UECE) - Fortaleza, Brazil | 2009 - 2017

International Exchange Program - Computer Science

Iowa State University (ISU) - Ames, IA, USA | 2012 - 2013

Languages: Portuguese: Native | English: C2/ Fluent

Technical & Game Development Skills

Game Development: Unreal Engine 5, Blueprints, Gameplay Prototyping, Hex/Grid-Based Systems.

Programming: C#, Object-Oriented Programming, JavaScript, TypeScript, .NET, SQL.

Software Engineering: Software Architecture, API Integration, Unit/Integration Testing, CI/CD, Agile/Scrum.

Game Design: Systems Design, RPG Design, Exploration Design, Encounter Design, Systems Balancing, Rapid Prototyping.

Tools: Unreal Engine 5, Git, GitHub, Visual Studio, VS Code, Azure DevOps, Jira.
