Dublin, Ireland | +353 087 625 4021 | STAMP 4 - Full Rights to Work in Ireland | guilherme.alm.araujo@gmail.com
| <https://www.linkedin.com/in/guilhermealmaraujo/>

I am a skilled Full Stack Developer with a track record in designing, developing, deploying, and maintaining both desktop and web applications. My primary expertise is within the .NET environment, complemented by proficiency in C#, JavaScript, HTML, CSS, Git, Visual Studio, and SQL. Nevertheless, I am a self-driven learner who embraces new challenges without hesitation. In addition to my technical skills, I place a strong emphasis on effective communication and collaboration, enabling me to work effectively within teams to tackle complex project features. I am genuinely eager to take on new challenges as opportunities for professional growth and development.

Relevant Experience

Software Developer at Flip-Pay - Dublin - Ireland (November 2022 - Present): Flip-Pay is a trailblazing company in Digital Publishing Content Monetization and Solutions, empowering digital publishers to accelerate their revenue growth. Their platform offers advanced user journeys, customer retention tools, segmentation, subscriptions, carts, and valuable insights.

- Collaborating in the development and maintenance of monetization content services composed of a web application, customised javascript script and an API.
- Collaborating on cutting-edge front-end development, using **HTML**, **CSS**, **Javascript**, and **Angular** to create captivating user experiences. Also, **Git** for version control, **VS Code** for code editing and **Azure DevOps** for project management.
- Integrating with the back-end team, leveraging C# and .NET Core with Google's database to ensure robust and scalable performance.
- Opportunity to work with a small but growing developers team from all over the world.

Software Developer at NoFrixion - Dublin - Ireland (April 2022 - August 2022): NoFrixion is an infratech banking startup whose product is a platform capable of giving their clients the capabilities of a real bank. NoFrixion clientele are able to provide financial services to their customers like bill payments and wire transfers.

- Collaborating in the design, development, maintenance of financial services composed of two websites and an API.
- Using tools and technologies including **C#**, **LINQ**, **ASP.NET Core**, **Entity Framework**, **Integration/Unit Testing**, **HTML5**, **CSS3**, **Javascript** with **jQuery**, **Ajax**, **TypeScript** and **SQL Server MS 2019** for database management. Also, **Git** for version control, **Visual Studio 2022** for code editing and **Jira** for project management.
- Usage of third parties APIs.
- Opportunity to work with a small but growing developers team.

Techlead | Software Developer at FitBank 450 - Fortaleza/CE - Brazil (June 2021 - March 2022): Fitbank is an infratech banking company whose product is a platform capable of giving their clients the capabilities of a real bank, very similar to **NoFrixion**, but FitBank is a much bigger company with an IT sector with over 300 people at that time.

- Collaborating in the design, development, maintenance and deployment of large scale financial services composed of a Website, an API and several microservices.
- Using tools and technologies including **UML modelling**, **C#**, **ASP.NET MVC**, **HTML**, **CSS**, **Javascript** with **jQuery**, **Ajax** and for database management **SQL Server MS 2019**. Also, **Git** for version control, **Visual Studio 2019** for code editing, **Azure DevOps** for project management and **Jenkins** for deployment.
- Usage of third parties APIs.
- Lead developer of a team composed of Junior Developers and Quality Analysts (Techlead).
- Heavily involved in the PIX project. An instant payment technology created by the Brazilian Central Bank (Bacen), integrated by Fitbank. Responsible for the QR Code share of the project.

Software Developer at Tactium - Fortaleza/CE - Brazil (February 2021 - June 2021): Tactium is a 25+ year old IT company that provides customer relationship management solutions (web and desktop applications) to their clients.

- Development and maintenance of Customer Relationship Management (CRM) services composed of two web applications. One, designed to manage tasks within a team project, and another, designed to communicate with customers through many different communication channels (SMS, email, Whatsapp) using a sole interface.
- Usage of third parties APIs
- Using tools and technologies including **C#, ASP.NET MVC, Entity Framework, HTML, CSS, Javascript** with **jQuery, Ajax** and for database management **SQL Server MS 2019**. Also, **Git** for version control and **Visual Studio 2019** for code editing.
- Design of new features and bug corrections.
- Experience on working within a team composed of senior developers.

Software Developer at Wipro - Fortaleza/CE - Brazil (May 2019 - December 2020): Wipro is a company focused on providing outsourced IT employees to their clients.

Outsourced to clients below:

Pague Menos: A pharmaceutical retail company that has many stores throughout the country.

- Development and maintenance of desktop applications meant to support the accounting and sales' department.
- Using tools and technologies including **C#, VB NET, VB6, ASP.NET MVC, ASP.NET Web Forms** and for database management **SQL Server MS 2017**. Also, **Git** for version control, **Visual Studio 2017** for code editing and **Azure DevOps** for task management.
- Collaborate with several other IT teams and other company departments.

Vicunha Têxtil: A big textile manufacturing company focused on the production of jeans.

- Development and maintenance of softwares meant to support textile manufacturing production. Opportunity to work with two different pieces of software there. one, a web application that was designed to assist machinery maintenance, the other, a desktop application designed to control some machinery in the production line (industrial automation).
- Using tools and technologies including **C#, ASP.NET Web Forms** and **Visual Studio 2017** for the web application and **Delphi 7/RAD Studio XE3** for the desktop application. For database management, both applications used **SQL Server MS 2017** and **PL/SQL**.
- Opportunity to work with a small but growing developers team.

Junior Software Developer at ND Engenharia e Software - Fortaleza/CE - Brazil (January 2018 - April 2019): ND Engenharia e Software is an IT company focused on providing solutions to manage clinical analysis laboratories.

- Development and maintenance of softwares designed to manage clinical laboratories, web and desktop applications, but mostly desktop.
- Using tools and technologies including **Delphi 7** for the desktop application and for the web application **C#, ASP.NET MVC, HTML** and **CSS**. For database management both used **SQL Server MS 2017**. Also, **Git** for version control and **Visual Studio 2017** for code editing.

Assistant Project Manager at Polígono Ambiental - Fortaleza/CE - Brazil (June 2015 - December 2017): A family business focused on the design and manufacture of tanks, structures, containers and the entire setting of wastewater/sewage treatment plants.

- Responsible for assisting the Project Manager in designing the tanks, structures and settings of the treatment plants, as well as helping to manage employees through the whole process of manufacturing and settings.
- Not a software development related position, however many technical and managing tasks involved in this whole process were handled manually, so I introduced some software tools that could automate some of these processes, such as: structural calculations that could be done easily through the use of spreadsheets powered by scripts in the background. In order for me to do so, I used **Google Spreadsheets** with **Google Apps Script (javascript)**. It saved us a lot of time, whenever a client requested a design solution, and to calculate the budget to implement it.

Intern at Xlung - Fortaleza/CE - Brazil (May 2014 - May 2015): A project sponsored by a physician that aims to design a platform to teach Mechanical Ventilation to medical students.

- Development and maintenance of a web application design to teach Mechanical Ventilation to medical students. This work experience was part of an UECE – (Ceará State University) scholarship.
- Using tools and technologies like **Ruby On Rails**, **HTML**, **CSS** and **Refinery CMS**.

Educational Details

Bachelor's Degree in Computer Science - Ceará State University (UECE) - Fortaleza/CE - Brazil (January 2009 - September 2017):

Computer Science Tutoring Extension Program – UECE – (Ceará State University) Scholarship (May 2010 to May 2012).

Projects accomplished while in the internship program:

- Java in Schools Project (2010 and 2011 Editions): Computer programming tutoring in public schools of Fortaleza, CE, focusing on Java programming language.
- Computer Science Week (2010 e 2011 Event Editions): Infrastructure group coordinator in both editions
- Ceará Computing Olympiad (2011 Edition, First): Coordination group manager.
- Co-author of the basic computer skills course textbook PRO-INFO.

Student Exchange Program – UECE (Ceará State University) Scholarship - Iowa State University (ISU) - Ames/IA - USA (August 2012 to June 2013)

Languages

English level - C2
Portuguese - Native

Technical Skills

- Excellent knowledge in **Object-Oriented Modelling** (Analysis & Design).
- Strong understanding of some programming languages, including **C#**, **Javascript**, **Objective Pascal**.
- Experienced with various web technologies: **ASP.NET Framework**, **ASP.NET Core**, **HTML**, **jQuery**, **CSS**, **AJAX**, **JSON** and **XML**.
- Several years working with **MS SQL Server**.
- Acquainted with agile methodologies, like **SCRUM** and **KANBAN**.
- Proficient with several development tools (code editors, project management tools, version control interfaces, diagram-drawing tools and others) like: **Visual Studio**, **VS Code**, **Jira**, **Azure DevOps**, **GitHub**, **GitBash**, **SourceTree** and **Diagrams.net**.
- Good experience with **Azure DevOps**, from version control (**Repos**), project management (**Board**) to CI/CD (**Pipelines**).
- Good understanding of **monolithic** and **non-monolithic** software **architectures**.
- At the moment I am studying the library **React**, for frontend development, the platform **Unity** for game development and **Microsoft Azure** for deployment.

Interests and Achievements

- Computers and technology.
- Electronic games, movies, D&D (and other Table Top RPG's, MMORPG games), martial arts, travelling, financial education, maths, physics and science in general.
- Drawing, 3D modelling.
- Karate State Champion (Ceará State Championship, may 2005).
